## WHEN TO GO...

The majority of our Madagascar trips take place March to December, this is when Madagascar is at its best. The weather and climate can change a lot throughout the year and when you go to experience this remarkable country, depends on your preferences.

### Madagascar Spring: **March - May** (Dry and Warm)

- After the rains have passed. Everything is lush and green and fertile
- March is great in the South West, but some roads in the North and West can still be recovering from the monsoon season.
- April and May is the perfect time to visit. Great wildlife, great weather and not too many tourists.

### Madagascar Winter: **June - August** (Dry)

- This ideal season for trekking / activities as is the coolest time in Madagascar. Temperature vary in the different areas but typically around 20 degree C
- Evenings (especially in the highlands) can get very cool at night (10 degrees C)
- Good time for seeing lemurs, but due to the cooler weather smaller mammals and reptile will be less active
- July and August can be busier in the national parks due to school holidays.
- August and September are ideal for keen birdwatchers to visit Madagascar.

### Madagascar Spring: **Sept - November** (Dry and Hot)

- September to November is highly popular, as even North Eastern Madagascar (this includes Masoala) is dry now.
- August and September are ideal for keen birdwatchers to visit Madagascar.
- It is hotter with very little rain, great for spotting chameleons and lizards, but quite hot for trekking / activities – in November temperatures start to rise rapidly.
- October is particularly perfect for witnessing baby lemurs.
- Main downside with this time of year is that it is the peak season so national parks are busier with more tourists

### Madagascar Summer: **December – March** (Hot and Rainy Season)

- The rains start to come. The North East is still relatively dry in December and we offer many Christmas trips.
- January/February should definitely be avoided as it becomes monsoon season - due to the heavy rainfall causing the already difficult roads to become muddy and impassable. The RN7 is still drivable so the 'classic' Madagascar route is still possible for those who can only travel in this season
- This is the best time of year for orchid lovers

*"My favourite time of year is **May** because the rains have finished so everything is lush and green. You don't see many other tourists as they tend to go in September and October, but everything is just beautiful – it's pretty perfect."*
