WEIRD AND WONDERFUL MADAGASCAR

This is thrilling and authentic family adventure which combines biking, canoeing, forest and mountain trails, with camping and eco-lodges. Exploring the captivatingly unspoilt, dramatic landscapes, spectacular parks/reserves, local villages and winding rivers of South East Madagascar. A truly off the beaten track journey – great for active families with older children.

MADAGASCAR *an overview*

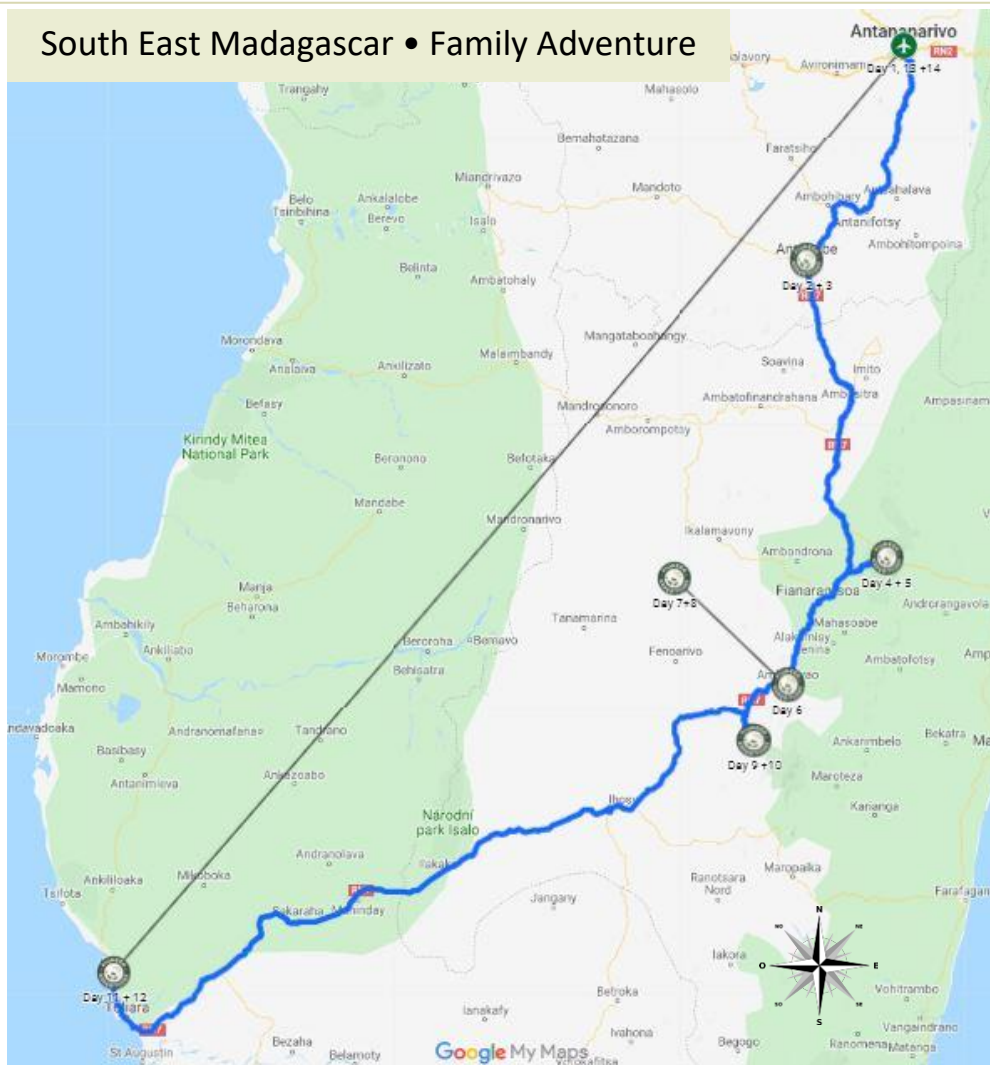

Madagascar is a one-off; there is no other place like it. Its landscapes, animals and plants are simply incredible! Near the equator with an astonishing array of habitats, ranging from rainforests to deserts and from mountain tops to mangrove swamps, it is one of the most important countries for biodiversity on the planet. The tropical climate is a perfect host to the process of nature and, like nowhere else, the variety and richness of life has flourished.

DAY 1: Tongasoa eto Antananarivo!

After arriving in Antananarivo (or Tana, as it is known by the locals), you will be met at the airport and transferred to your hotel.

Antananarivo is the capital and largest city in Madagascar. It is buzzing with activity and full of people flooding the streets, selling everything you could imagine! Tana (as the locals call it) resembles a Mediterranean hill town and exploring its rich cultural and architectural sites on foot is relatively easy (as long as you are willing to climb hundreds of ancient stone steps) It is a hectic city though and we would recommend a driver / guide if you want to explore!

Day 2: Heading south to the charming town of Antsirabe

After breakfast you will meet your guide and we will set out by car to Antsirabe.

Antsirabe is a tidy, well maintained town which combines the tranquility of a small European provincial town with the exuberance of traditional Malagasy buildings. The third largest city in Madagascar, Antsirabe is known for its relatively cool climate (as the rest of the central region of the country), its industry and the high concentration of pulled rickshaws.

The journey takes approx. 3+ hours on a good, windy road, and along the way you can choose to stop off and visit Ambatolampy (the biggest town between Tana and Antsirabe) where we may get the chance to see craftsmen building aluminium pots amongst other things. Alternatively, if time allows, you can also visit lake Tritriva (2hr round trip) – a stunning lake of volcanic origin with blue/green waters, surrounded by beautiful scenery – we can walk around the lake in approx. 1 hour and during this time we will likely meet many local Malagasy people. Where we will stop and what you will do today will depend on your preferences. Before arriving in Antsirabe, today will be a great chance to experience Malagasy life on the road.

DAY 3: Lake Tritriva and Lake Andraikiba & Cycling back to Antsirabe

Today we will head by car to Anraikiba Lake. This reservoir provides the drinking water for Antsirabe. We will visit the lake and see the rice fields, fruit and vegetable plantations. We then head on, as we reach the village of Belazoo we will be able to see Mount Tritriva and we continue on to reach another, more spectacular lake – Lake Tritriva

This Crater Lake with its volcanic landscape was formed following the collapse of the now extinct volcano.

Nestled at an altitude of about 1880m to the hollow of a small mountain, Tritriva Lake is a very sacred lake with much history. We will learn about some of this history whilst we visit this area and local market. After a picnic lunch we will start our cycle – back to Antsirabe through multiple small villages and rice fields as we get to experience authentic Malagasy life.

DAY 4: Arriving at the magnificent Ranomafana National Park

This morning we will set off for Ranomafana National Park

Ranomafana is particularly rich and beautiful, a mountainous subtropical park which contains lowland moist forest, cloud forest and high plateau forest and is the home to a large number of lemur species (13 in total), as well as 118 birds and more than 70 amphibians and reptiles so is really a great place to see some of the unique species living in Madagascar. Lemurs include the brown lemur, golden bamboo lemur and the exceptionally rare greater bamboo lemur which is relatively easy to see in Ranomafana. Wildlife viewing is good all year round but is most productive from mid-Sept to May.

We will stay just outside Ranomafana (just 10 minutes from the park entrance).

DAY 5: Discovering the wildlife and beauty of Ranomafana National Park + Hot Springs

Today you have the opportunity to explore the enchanting Ranomafana National Park through lush rainforest and search for lemurs along some of the many easy mountainous tracks. There will be plenty of opportunities to see lemurs and much of the other wildlife first hand, as well as to enjoy the stunning cascades and waterfalls.

This afternoon you have the option of visiting the thermal baths in Ranomafana or looking around the village which offers the most superb scenery.

DAY 6: Rafting the Namorana River + journey towards Ambalavao

This morning we will spend a couple of hours rafting on the Namorana River inside the National Park. After we pull out, we will head to Ambalavao.

If time allows, you should get a chance to visit the vibrant town of Ambalavao before heading to your accommodation and some time to relax.

Situated in tropical surroundings in the most southern part of the central highlands, near Fianarantsoa, Ambalavao is noted for its houses with wooden balconies with elaborate carvings and tiled roofs. It is also known for its lively cattle market on Monday and Thursdays on the outskirts of town where you will be able to see a large number of Zebu and herdsmen on the roads.

DAY 7: Begin thrilling descent of the Manantanana River in search of crocodiles!

Today we arrive at the edge of the Manantanana, in the village of Iarintsena. This village is actively involved in the development of rural tourism.

After preparing our boats, we board the kayak or raft for our new adventure.

The first crocodiles are waiting for you, only a few minutes after departure. Over the course of the day, you will see even more crocodiles, although you have to remain quiet and calm due to the timid nature of this elite predator, which is still hunted for its meat, skin and oil.

Bury yourself in the heart of a fascinating world. A calm river that weaves between high granite walls. It is home to numerous crocodiles, which can be regularly seen sunbathing and living in relative harmony amongst the riverside population. Hunting has made them wary of humans, but in recent years their number seem to be increasing, decreasing pressure on the species and allowing them to roam more freely. Our trips also help to promote their presence, encouraging local people to protect them from poaching.

In the evening, we will set up our camp to face the mountain of "lying woman" that dominates the Antsakaviro reserve.

Overnight:
Camp

Meals:

DAY 8: Visit Antsakaviro Village + continue Manantanana River adventure

The reserve is only 1 km from the camp and we will enjoy using the rays of the sunrise to guide us to the remains of this forest, which is set in gigantic puzzle blocks.

Antsakaviro village is a reserve initiated by a local association. Ideally located at the foot of the 'woman lying,' it deserves our support. The ring-tailed lemurs may be waiting for you at the foot of this huge cliff face that gives its character to this spectacular site. The reserve is relatively small, being on twenty hectares and the villagers have begun restoring the site by replanting endemic species on the edge of the forest.

It is a great opportunity to encourage local people to protect the natural heritage of their land and is also a beautiful walk in the shadow of the impressive mountainside of Antsakaviro. On the way, we will discover many graves, including the impressive standing stones called the vatolahy, which means locally "the male stone", and stand as a tribute to the tumultuous past of this region.

We will arrive back at camp at approximately 10:30 from here we paddle a short distance to our picnic area which is often visited by crocodiles. From here we only have a few more miles to the finish of our descent. We will arrive 400 meters away from where we met our car and driver, from which we will head back to Ambalavao.

DAY 9: Experiencing wildlife at Anja Reserve and journeying to Tsaranoro Valley

This morning we visit Anja Park, just a short drive from Ambalavao.

Created in 2001 and located near Ambalavao, the Anja Community Reserve is a woodland area and freshwater lake, at the base a large cliff. Most of the reserve is dominated by fallen rocks and boulders but interestingly there are two small caves providing habitat for bats and owls. The reserve was created to help preserve the local environment and wildlife and is one of the more touristy places you visit, however is perfect for lovers of walking and wildlife and offers a unique occasion to interact with 'wild' ring-tailed lemurs somewhere between tamed and familiar!

After visiting the reserve we will drive to our next destination – the Tsaranoro Valley (approx. 2 hrs away). This afternoon we can explore on a short trekking adventure or simply relax. Our accommodation here will be a traditional bungalow situated at the foot of Tsaranoro’s cliff.

Visiting the Tsaranoro Valley is a fantastic opportunity to see Madagascar in all its natural glory. Prepare to be enchanted by the astounding landscapes, stunning red land and the beautiful and awe-inspiring Massif of Andringitra. You will be able to see many kinds of orchids, three sorts of palms including one kind which is endemic to the Andringitra, chameleons, lizards, snakes, batrachians, birds including the famous peregrine falcon as well as the especially friendly Catta (ring-tailed) Lemurs living in small families around the camp. The spectacular rock walls of the massif and the mind-blowingly beautiful valley offer numerous climbing routes and hiking trails and a thriving village which can be visited.

Facing the Mozambique Channel and the superb coral reef of Ifaty, less than 20 kms from Tuléar, you will discover the beauty of beaches not tainted by mass tourism. Ifaty is a small fishing village with palm-fringed white beaches on the south-western coast of Madagascar, and is an ideal place to relax after visiting the central highlands. The beach is relatively narrow, but the (off shore) snorkeling and diving is good. In July and August, you may see migrating whales pass nearby through the Mozambique Channel. Between May and October, the humpback whales can sometimes be seen with their whale-calves.

Upon arrival in Ifaty, your driver and guide will leave you. Your time at the coast will be at your leisure

DAY 12: Discovering the surrounding fascinations of Ifaty

Today at your leisure, experiencing what beautiful Ifaty and its surrounding areas have to offer. (We can easily extend your days on the beach if you prefer)

Just north of Ifaty you can find the Reniala Nature Reserve ‘Spiny Forest’ , a remarkable habitat adapted to the heat and drought of the area giving it the resultant thorny &/or bloated drought resistant trees and plants. The spiny forests inland from Ifaty are of great interest to birdwatchers and botanical enthusiasts alike. Here you will be able to see some very large iconic Baobab trees, an abundance of birds (a true paradise for ornithologists) as well as possibly some locally endemic species such as the long-tailed ground roller and sub-desert mesite. This unique habitat is severely threatened by deforestation and by visiting these sites, you will not only enjoy some of the little remaining spiny forest in Madagascar, but also actively contribute to its conservation (the sites are currently not protected). A visit here can be organized by the hotel, and you can even travel there by pirogue – which we highly recommend.

NB: This itinerary is subject to change – arrangements, routes and facilities are subject to variation depending on local conditions. When driving times are given, this is only an indication. It aims to reflect the actual driving time (and doesn't include stops, lunch, traffic). The road journeys, while often long, are one of the great ways to experience Madagascar. There is so much life on the road and many photographic opportunities along the way from a natural and people perspective.

On this particular trip there is a minimum age of 8 and some previous outdoors experience is useful. We can also **tailor itineraries** to suit your exact requirements including catering for younger children.

GETTING AROUND

- Transport will consist of 4x4, to give you the most authentic, off-the-beaten track experience. These vehicles are best at tackling the challenging roads that Madagascar primarily consists of.
- Madagascar is notorious for the unreliability of its domestic flights in terms of time. The flights schedules are always subject to change at anytime and often experience cancellations, which are not ideal when following a schedule; this makes it a lot more reliable to travel by road for the most part.
- Distances and times will of course be lengthy due to the vastness of the island and lack of good-quality road systems throughout the country. However, this all adds to the adventurousness of any Madagascar trip; but is definitely something to be aware of whilst travelling around Madagascar.

WHEN TO GO...

The majority of our Madagascar trips take place March to December, this is when Madagascar is at its best. The weather and climate can change a lot throughout the year and when you go to experience this remarkable country, depends on your preferences.

Madagascar Autumn: **March - May** (Dry and Warm)

- After the rains have passed. Everything is lush and green and fertile
- March is great in the South West, but some roads in the North and West can still be recovering from the monsoon season.
- April and May is the perfect time to visit. Great wildlife, great weather and not too many tourists.

Madagascar Winter: **June - August** (Dry)

- This ideal season for trekking / activities as is the coolest time in Madagascar. Temperature vary in the different areas but typically around 20 degree C
- Evenings (especially in the highlands) can get very cool at night (10 degrees C)
- Good time for seeing lemurs, but due to the cooler weather smaller mammals and reptile will be less active
- July and August can be busier in the national parks due to school holidays.
- August and September are ideal for keen birdwatchers to visit Madagascar.

Madagascar Spring: **Sept - November** (Dry and Hot)

- September to November is highly popular, as even North Eastern Madagascar is dry now.
- August and September are ideal for keen birdwatchers to visit Madagascar.
- It is hotter with very little rain, great for spotting chameleons and lizards, but quite hot for trekking / activities – in November temperatures start to rise rapidly.
- October is particularly perfect for witnessing baby lemurs.
- Main downside with this time of year is that it is the peak season so national parks are busier with more tourists

Madagascar Summer: **December – March** (Hot and Rainy Season)

- The rains start to come. The North East is still relatively dry in December and we offer many Christmas trips.
- January/February should definitely be avoided as it becomes monsoon season - due to the heavy rainfall causing the already difficult roads to become muddy and impassable. The RN7 is still drivable so the 'classic' Madagascar route is still possible for those who can only travel in this season
- This is the best time of year for orchid lovers

*"My favourite time of year is **May** because the rains have finished so everything is lush and green. You don't see many other tourists as they tend to go in September and October, but everything is just beautiful – it's pretty perfect."*

- **Laurenne Mansbridge**
Pioneer Director
